

VendaVolt M3P®

Electric Vehicle Level II Dual Charger Cashless Payment Station

FEATURES

Level II UL Listed VendaVolt Electric Vehicle Cashless Payment Charger

The VendaVolt 40A Dual Cashless Payment Charger Station charges nearly all Electric Vehicles sold and operated in North America manufactured since 2010. Features a weather-resistant housing.

The VendaVolt Electric Vehicle Level II 40 Amp Charger Cashless Payment Station is built to exceed NEMA 3R standards, making it weather-resistant and suitable for indoor or outdoor installation. It will operate safely in rain, snow, sleet and ice. Cashless Payments processed by the Nayax Vpos Touch wireless processor terminal.

Is it compatible with my Electric Vehicle?

Yes! The VendaVolt Cashless Payment Level II Charger Station will charge virtually any single or two electric vehicles at the same time. Providing the required input of 220~240 volts required to fast charge up most electric vehicles in North America.
